Felipe Buccioni

About

With more than 20 years of experience in constant improvement and searching for innovation. My professional life is spent in a variety of industries and markets, where I have led several projects in software development and information technologies, the value that I will be able to bring to your work is finding creative, fresh and flexible solutions to complicated challenges.

Experience

Because of my long career, this is my highlighted experience, for more information please ask me directly.

ChatLPO
Employee

Software architect & lead developer
From 2025-07 to 2026-05

- **Led the architectural evolution of a monolithic application** into an modulith with hexagonal architecture as strategy to reach microservices ecosystem. **(Tech leadership, software engineering, software design patterns, FastAPI)**
- **Designed and implemented code policies and development guidelines. (Python, strict type annotations, SOLID, Clean code, OpenAPI, hexagonal architecture)**
- **Made a Hexagonal Architecture framework**, leveraging advanced design patterns and developing encapsulated, reusable CRUDL components (repositories, services and views) with optimized filtering and pagination. **(DI, Containers, Factory, Builder, SOLID, Class based views, Python, SQLAlchemy, SQLModel, alembic, FastAPI, Pydantic, hexagonal architecture, Software documentation)**
- **Upgraded and hardened production RAG app from an MVP+ status** by decoupling services, separating LLM prompting/tuning and securing environments with secret managers. **(SRP, Security, Lead developer)**
- **Cloud management, improvement of pipelines and create environments (Azure DevOps, Azure cloud, Azure permissions)**
- **Optimize IA and third-party integrations** refactoring critical services and improving third-party integrations **(LangChain, Prompt engineering, Image Generation, Vector Search, Eventing, MSSQL, RAG, OpenAI, OpenAI vector store)**
- **Optimize relational database management and architecture** by redesigning tables, indexes, implementing migrations and a decomposition plan **(SQLAlchemy, SQLModel, Pydantic, alembic, MSSQL)**
- **Improve prompts and LLM results** using prompt engineering, provide structured contexts and tool calling / function calling **(LLM, LangChain, prompt engineering, LLM tooling, text structuring, RAG, Pydantic)**
- **Provide technical mentorship and comprehensive architectural documentation. (Software Engineering, Mentoring, Guide, Software documentation)**
- **Delivered cross-functional consultancy to optimize business operations (Process optimization, marketing, team management, BI)**

aequum framework
Open source personal project

Creator
From 2025-04 to 2025-06

- **Designer, planner and developer for a framework to build applications in hexagonal architecture** for NestJS or standalone, to make common things easier to make, with features like simple CRUD/CRUDL services and controllers with full OpenAPI, TypeORM and Mongoose paginated repositories, authentication, authorization, DTOs, types and more. **(NestJS, software design patterns, TypeScript, Swagger, TypeORM, Mongoose, npm)**

Skills

Lead and management
- Development planning
- Problem solving
- Team management
- Infrastructure design
- Database design
- Software Engineering
- Software architecture
- Software design
- Design patterns
- Lead developer

ML / LLM
- Prompt engineer
- Tool calling / Function calling
- RAG
- OpenAI API
- Google LLM API
- OpenAI vector store

Development
- Plugin
- Libraries
- Backend
- REST API
- Full stack
- Integrations
- GIS
- Geoprocessing

Languages
- Python
- TypeScript
- JavaScript/ECMAScript
- CSS

Frameworks and libraries
- FastAPI
- NestJS
- Django REST
- Flask
- Angular
- GeoDjango
- leaflet
- OpenSeadragon
- PostGIS

Cloud providers
- AWS
- Azure

DevOps
- CDK
- Docker
- Linux
- Pulumi
- Pipelines
- git
- bash

Services and tools
- ffmpeg
- Mapserver

DIGINTEG
Freelance

Solution Architect
From 2025-01 to 2025-03

- **Software design, backend and frontend developer for a data source application**, creating data structures for the client to fill it with data, which will be exported via JSON to ads screens. **(NestJS, software design patterns, Mongoose, Angular, aequum)**

Upki
Startup project

Founder, tech leader, lead and backend developer
Since 2024-10

- **Planner, architect and tech leader of a SaaS platform** to manage scholar transport. **(Problem solving, architecture, software design, infrastructure design)**
- **Team leader and management of a small team** of 3 internship students on frontend and backend development, 1 designer and 1 DevOps **(Project management, team management, leadership)**

Modulonet
Freelance

Technical architect, library and browser developer, R+D
From 2024-04 to 2024-09

- **Library to load a MDF, high resolution tile format** based in MS-CFB container format, using binary I/O to work with files inside the container and caching with blobs **(ES/JavsScript, MS-CFB, JSDoc)**
- **Plugin for OpenSeadragon to load MDF tiles** as tile source **(ES/JavaScript, OpenSeadragon, npm, JSDoc)**
- **Plugin for OpenSeadragon to draw a rule to measure**, able to use custom measure units, presserving scales and positions when zoom or pan. **(ES/JavaScript, OpenSeadragon, npm, DOM, fabric.js, JSDoc)**
- **Plugin for OpenSeadragon to pan when mouse are in the edges of the viewer** **(ES/JavaScript, OpenSeadragon, npm, DOM, JSDoc)**
- **Plugin for OpenSeadragonto draw shapes and annotations**, associate text to the annotations and calculate areas, perimeters and length with custom measure units, presserving scales and positions when zoom or pan. **(ES/JavaScript, OpenSeadragon, npm, DOM, fabric.js, JSDoc)**

Dily / TransaTuAuto
Employee

Senior Backend Developer
From 2022-10 to 2024-03

- **Build up development processes and do a recover plan** from a refactor with a bunch of bad practices that left the software in a bad state, with a lot of bugs and performance issues in the software, infrastructure and development **(Problem solving, Software Architecture, Software design, Infrastructure design, php, Yii2)**
- **Architecture, software and infrastructure design** **(Architecture, Software design, Infrastructure design, Design patterns)**
- **Mantainance and improvements of legacy software** **(php, Yii2)**
- **Backend developer** in node.js and TypeScript **(Design patterns (Hexagonal, Repository, Aggregate, Anti corruption layers), InversifyJS, express, knex, advanced TypeScript typing)**
- **Integration development** **(Webhook, Queue, Lambda, ETL)**
- **Design of plugin system** with abstract classes and interfaces to different providers on different parts of the software **(Design patterns)**
- **Payout platform with isolated infrastructure** **(Solution architect, TypeScript, AWS, AWS CDK, AWS lambda, AWS SQS, AWS Secrets manager)**
- **Improvement of custom framework** based on different design patterns **(Design patterns)**
- **DevOps** **(AWS, BitBucket, bash, Linux)**
- **SQL Complex reporting queries and query optimization** **(SQL, Query optimization)**
- **Interoperability of legacy and new software via anti corruption layer** **(Design patterns, Anti corruption layers)**
- **RPA optimization and improvement** **(python)**
- **Development of node.js library** to connect to Shinkansen finance provider porting their python package **(ES/JavaScript, TypeScript, JSDoc, npm)**

Kudzu logistics
Employee

Senior Backend Developer - Library Developer - Integration developer
From 2020-03 to 2022-08

- **Planning and developer of REST service for a car insurance company** to quotate, request and show details as costs, trips, behaviour and stats from cars insured by company. **(python, FastAPI, Azure functions, Azure CosmosDB, Azure CosmosDB API for MongoDB, MongoDB, serverless arch)**
- **Planning and development of intermediate app to manage the logistics of GPS devices** between the insurance company, telematics company (Octo Telematics), logistics company and couriers. **(Design patterns, python, Django, Django REST, Django JET, multiprocessing, webhook arch, queue arch, API integration, OCTO web services)**
- **Development of Python packages** to connect with DHL XML Services and FedEx/TNT Chile API **(python, API integration, XML, REST, RPA, selenium)**
- Integration with FedEx/TNT Chile **(python, String phonetics/coincidences pattern, AWS S3, PDF manipulation)**
- **Integration of shipping with Jumpseller, Woocommerce and Shopify** **(python, Web2Py, Jumpseller API, API Integration, Woocommerce, Wordpress plugins, WP REST, Shopify API)**
- **Integration of SAP products and stock update with Woocommerce** **(php, WordPress, Woocommerce, Wordpress plugins, WP REST)**
- **Integration of bsale with Shopify** **(python, flask, sharedmem, Shopify API, bsale API)**

Complementary skills

- Query optimization
- Documental databases
- Relational databases
- DevOps
- Networking
- RPA
- ETL
- Webhooks
- Queue
- Media streaming
- Image compression
- Computer cartograpghy
- Wowza management

Modulonet
Freelance

Backend/API developer
From 2022-04 to 2022-06

- **Development of a library API to sign PDF files** using a commandline tool as backend **(php, php 7, API, phpdoc)**

Somoscircular
Freelance

Lead and backend developer
From 2021-04 to 2021-05

- **Lead and backend developer on refactor the client and management processes** of somoscircular.com **(python, Django, Django REST, Django JET, GeoDjango, Google Geocode, Mailchimp, Twillio)**

ETYCC S.A
Freelance

Co-project Leader - Backend developer
From 2020-12 to 2021-01

- **Co-Project Leader/Backend developer of app/platform for COVID-19 traceability** for the Aysén Region in 1 month, also act like problem solver with the deployment on iOS with ionic **(python, Django, Django REST, Django JET, JWT Auth, GeoDJango)**

ETYCC S.A
Freelance

type="Freelance"Co-Project Leader - Backend developer
From 2020-09 to 2020-09

- **Co-Project Leader/Backend developer of long form** for bank application in 3 weeks **(python, Django, Django REST, Django JET)**

Think2Process
Freelance

RPA developer
From 2020-06 to 2020-09

- **Multiplatform (Windows and linux) RPA Robot** who enters bank data to ERP software **(python, OpenCV, TKInter, multiprocessing, sharedmem, IPC, Image processing, pyautogui, multiplatform Python, Design patterns)**

Retargeting
Employee

Backend Developer - DevOps
From 2017-11 to 2020-02

- **Infrastructure migration to AWS using infrastructure as a code (IaaC)** using autoscale, RDS, Route53 and compute services **(ES6, pulumi, aws, puppet)**
- **Perimetral authentication and authorization system** **(python, Django, MongoDB, django-mongoengine, Django REST)**
- **Middleware manager to manage permissions for internal services**, some process need buffered stream output. **(Django, REST API, HTTP, Proxy, Streaming, AWS S3, AWS Athena)**
- **Orchestration** **(puppet)**
- **Pipelines** **(GitLab CI)**
- **Product management application for retail store.** **(python, Django, REST API, KnockoutJS, bootstrap 4, datatables)**
- **Extension of the previously mentioned app for export products to Salesforce and WebSphere commerce platforms.** **(python, Django, XML, PyFilesystem, multiprocessing)**
- **Basic scala programming** **(Scala)**

VRIM Universidad de Concepción / AM Nonguén
Project

Solution architect for GIS
From 2017-01 to 2017-06

- **Planner, architect and developer of a GIS platform for territory planning** also being oriented to show to the community, the Nonguén national reserve alongside nearby ecosystems and all the collected data from university researches, hydric resources, flora and fauna and more. **(Infrastructure design, Software design)**
- **Cloud storage service to upload document and cartography data to be displayed in the GIS** **(ownCloud)**
- **Cartography service using GeoJSON** with an administration interface to manage the cartography** to be shown in the GIS frontend, configuring properties as styles, labels from feature data and the data source which could be PostGIS, A file system with a different cartography formats (SHP, DXF, MapInfo, ect.), TMS service or XYZ tile. **(Django, GeoDjango, Django REST, PostgreSQL, PostGIS, GDAL)**
- **MapServer with MapCache to use as TMS server** to show elevation data and other large image sources provided form the university research with queryable data inside. **(UMN MapServer, UMN MapCache, Image processing)**
- **XYZ tile files from a large aereal geopositioned image**, postprocessing the tile images with techniques of overcompression png images, served with nginx **(XYZ tile, gdal2tiles, Advanced image compressing, nginx)**
- **GIS frontend to show data from the GIS service**, showing custom labels, legend and query data from the Cartography service, TMS and XYZ tile services. **(leaflet, ES/JavaScript, CSS, HTML, jQuery, proj4js)**
- **Improvement of Leaflet.SLD plugin features to access SLD styles** exported from QGIS **(leaflet, ES/JavaScript)**
- **Mobile app to field survey**, using Android tablets aproaching GPS tracking and positioning **(Cordoba, node.js, Django, Django REST, bootstrap 4)**

IPLink hosting
Freelance

nginx plugin developer
From 2014-09 to 2014-09

- **Build of a SMTP gateway** developing a perl nginx module to deliver SMTP mail to the clients of a small VPS company **(perl, nginx)**
